CURRENT RESEARCH

Meta-analysis on career decision making self-efficacy and parental support in collectivistic cultures and individualistic cultures

- Examine if parental support and career decision making self-efficacy, and their subscales have positive correlation with each other
- Study if this correlation is more significant in collectivist cultures

Do parent's career success affect children's career success?

- Test if parent's career prestige, occupation's job zone and job satisfaction affect those of children
- Study how this relation has changed over generations using Longitudinal Study of Generation data
